

Sander Log

04-20-15
Sander arrives.

05-17-15
Runway sanded. Started using Mike's 4 wheeler, it broke, then used pickup.

06-03-15
Adjustable jack added

07-2-15
Shelter built to store sander

10-02-15

Sanded future Geotex area

Noticed left most tire not holding air

4-29-16

Flat tire pumped up, Warren put a strap around it and then added air, it sealed to the wheel and is holding air.

5-5 Flat again, air added

5-6 Chains, gears and bearings in box greased.

5-7 Used to sand runway

5-8 Tire low again, pumped in some tire seal and pumped up to 30 psi.

Axle bearings greased and sander washed.

5-16 Tire still full of air

5-24 Tire still full of air

2018

9-19 Tire low added air, lubed and tested.

9-20 Used to sand runway

2019

10-11 Three tires low, added air. Tested pulling with craftsman mower, OK empty, need to try with a load of sand in it.

2021

10-14 Five tires low, added air. Greased bearings and chains.

2022

8-24 Left two tires low, added air.

8-28 Far left tire flat again, air added. Need some flat fix.

Switch to turn on and off spreader bad, needs repair/replacing.

9-9 Repaired broken wire on switch, replaced alligator clips.
